

Laboratory Manual

BIOPHYSICAL AND BIOANALYTICAL LABORATORY

Chem 112L

Department of Chemistry and Biochemistry

University of California, Santa Barbara

Spring 2005

Contributions by:

Dr. Kalju Kahn

Dr. Stanley Parsons

Jamie Bishop

Santa Barbara, 2000-2005

TABLE OF CONTENTS

I	Syllabus and general course information	3
II	Schedules for sections 1 and 2	7
III	Lecturer notes about experiments	11
1.1	Conformational Analysis of Allantoin. Part I: Conformational analysis	19
1.2	Conformational Analysis of Allantoin. Part II: Monte Carlo simulation	27
1.3	Conformational Analysis of Allantoin. Part III: NMR	40
2	Protein Unfolding Monitored by Circular Dichroism	52
3	Ligand Binding by Lysozyme: Determination of the Equilibrium Constant	68
4	Mass Spectrometry Characterization of Proteins	79
5	Inhibition of Glyceraldehyde-3-phosphate Dehydrogenase	86
6	Protein crystallography	108
	APPENDIX	128
